***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with James K. Folker on June 28, 2004.

The application has been amended as follows:

- Claim 1, line 5: after "information", the following phrase was inserted: "and an intermediate layer provided between said magnetic recording layer and said reproducing layer;"
- Claim 2, line 2: the phrase "further comprising" was replaced with "wherein said intermediate layer is";
- Claim 2, line 3: the phrase "provided between .... reproducing layer" was deleted;
- Claim 3, line 2: the phrase "further comprising" was replaced with "wherein said intermediate layer is"; and
- Claim 3, line 3: the phrase "provided between .... reproducing layer" was deleted.

***Reasons for Allowance***

3. The present claims are deemed allowable over the references previously of record since the references previously of record fail to disclose or render obvious a magneto-optical (MO) recording medium comprising a reproducing layer comprising at least two magnetic layers formed as an integral layer, both having perpendicular magnetization, Curie temperatures of between approximately 250 – 300 °C and formed of an alloy including Gd, wherein the difference in Gd composition between the first and second reproducing layers is in the range of 0.5 to 3.0 at%.

In addition, newly discovered art directed to Tanaka et al. (U.S. Patent No. 5,754,500) discloses a MO recording medium, but fails to teach or render obvious "an intermediate layer provided between said magnetic recording layer and said magnetic reproducing layer" while further maintaining the difference in Gd at% of adjacent magnetic layers forming the reproducing layer to be within 0.5 to 3.0 at%, as well as the Curie temperatures of both layers being in the range of 250 – 300 °C.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1773

***Examiner's Comments***

5. To clarify the record, the Examiner notes that the language "at room temperature" in claim 1 did not appear to derive explicit support in the as-filed disclosure, which necessitated its removal to avoid possible new matter issues.

***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M Bernatz whose telephone number is (571) 272-1505. The examiner can normally be reached on M-F, 9:00 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Thibodeau can be reached on (571) 272-1516. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
